interai

Tomer Zuaretz

Interai's platform enables organizations to build new processes on top of their existing systems, with zero integrations - only by using computer vision on systems' UI layer, enabling their employees to perform their day-to-day tasks with fewer systems, fewer steps, in a centralized interface, accelerating process efficiency and accuracy. We help orgs increase process efficiency - in sales, service, and more - by 50%+ in a matter of days.
Website: www.interai.co

Raycatch

Haggai Hofland

Raycatch is a leader in the AI for Solar Energy field. Our DeepSolar™ SaaS solution, is the first fully-automated AI diagnostics system for PV plants. It applies advanced algorithms to existing plant data in order to provide actionable insights. The system shows exactly where the problem is, how to solve it, and whether fixing it is a worthwhile investment. This enables plant owners and operators optimize their portfolio energy yield, reduce operational costs and increase ROI, leading the way to fully automated management of solar assets.
Website: www.raycatch.com

Raised: $7.5M
Vertical: Energy, AI, Industrial IoT.
Looking for: Energy Funds (PE's) that own a Solar Portfolio to establish partnerships for the deployment of Raycatch's solution in their solar portfolio, and VC's that invest in the Energy domain.
Investors: Royal DSM CVC, BayWa re CVC.
Notable Customers: EDF, Adani, Foresight among others.

IRONSCALES

Eyal Benishti

IRONSCALES is the leader in anti-email phishing technologies. Using a multi-layered and automated approach to prevent, detect and respond to today's sophisticated email phishing attacks, IRONSCALES expedites the time from phishing attack discovery to enterprise-wide remediation from months to seconds, by significantly reducing the workload on incident responders. With headquarters in TLV and Atlanta, IRONSCALES was founded by a team of security researchers, and IT and penetration testing experts, as well as specialists in the field of effective interactive training, in response to the phishing epidemic that today costs companies millions of dollars annually.
